M105 DIGITAL

DUAL CHANNEL

W/BATTERY LEVEL TESTER

Congratulations on purchasing the M-105 Digital DC W/BATTERY LEVEL TESTER!
 This unit has the same features as the M-105 Digital with the addition of a 2nd communication channel.

Operation

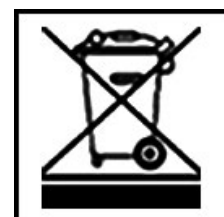

1. Turn on the unit as you would the conventional M-105 Digital.
2. A recording will inform you that you are operating on "channel 1" (32.768 KHz). This is the default frequency.
3. If you wish to switch to "channel 2" press the button indicated in the picture. You will hear a recording say "channel 2."

WARNINGS

On each frequency you may only communicate with units using the same frequency. It is NOT possible to communicate with underwater units operating on a different channel/frequency.

List of channels/frequencies

Channel 1	32.768 KHz
Channel 2	41.000 KHz
